tort-term note issues bearing onerous tes of interest.
The sale of a long-term railroad bond sue to a syndicate of bankers, thereire, was regarded as highly significant the definite paragraph of an era of
apaired or suspended credit for railroad
orporations which made severe difficulties for them in the carrying on of imortant activities in improving and exending their capacities. The fact of a
tree portion of the new bonds having

mening of a way to tap the great stores gen placed abroad aroused hopes of the pening of a way to tap the great stores of foreign capital to aid in the resumpton of profitable activities in this country. Remembrances were awakened of he part played in the financial revival in \$97 by the successive issues of \$50,000,000 of bonds by the Lake Shore and of \$100,000 by the New York Central. These efunding bond issues hore 23 per central results in both cases and their successful lotation came at an opportune time to ffect the refunding of large maturing successful hereis of high interest-bearing bonds of hose companies.

Much deceptive speculation was injuged in over the supposed new era of the property without due perception of the ountry without due perception of the ountry without due perception of the suge part played by the prolonged busiess stagnation in pilling up idle funds hank reserves and beauty was barely served.

sign part played by the prolonged busi-less stagnation in piling up idle funds in bank reserver and keeping timid capi-al out of employment. The present \$40-190,000 Pennsylvania issue, a first-rate se-urity-bearing four-per-cent, and sold at a discount of several points, shows some narked contrasts with the stagnant noney markets which facilitated the van-levolit refundings in March of 1897. The day's market was dull and reflected to expansion of interest beyond the nar-ow professional limits in which it has seen held for some time. United States

held for some time. United States held for some time. United States and Union Pacific were effective ers in sustaining prices, supplemented fively by the advance in Reading strength of United States Steel was diargely on the resemble. The strength of United States Steel was based largely on the personality of the buyers and of the inferences of their influential connections in the steel industry, which were drawn. Union Pacific was helped by some rumors, one of which was that arrangements had already been made for placing a large portion of the intended bond issue abroad. These rumors were without verification.

Money on call was slightly firmer, influenced by the large engagements of gold for exports, which reached \$5.500,000 for tomorrow's French steamer. The volume of these shipments was not a surprise and the stock market treated it with indifference. The foreign participation in the Pennsylvania bond issue on the trading was shown in the profit-taking by traders after the late announcement.

DEARTH CONTINUES IN MARKET DEALING

Trading: Shipments of Fruit and Vegetables Expected.

Wednesday was an unusually dull day for the dealers on market row, in fact, it was a dull day almost everywhere, probably on account of the unsettled condition of the weather. Customers were few and far between, and nothing new was seen on the stands. No changes were reported in the various quotations and the dealers passed away the greater part of their time preparing the stalls for a large shipment of Culifornia fruits and vegetables which is expected to arrive Friday. Two carloads of apples from laaho will be received Thursday, according to the story of the commission men. Strawberries are selling better now than any other product on the market, and it is expected that within a very short time this lascious fruit will be offered at the rate of three boxes for 25 cents.

GRAIN MARKET WEAK AND ALSO IRREGULAR

Slight Decline in Tin; Copper Unsettled Weather Discourages Strength During Opening Hour Discounted by News of Favorable Crop Reports.

CHICAGO, April 22.—The wheat market was irregular, the May delivery being strong during the entire session and the more distant deliveries quite weak at times. The market was decidedly strong the first half-hour, owing to an urgent demand for the May option and to the scarcity of offerings of that option. Small receipts in the Northwest and the firmness of European markets were the factors on which the demand was chiefly based.

tors on which the demand was chiefly based.

Later in the session sales of the July and September deliveries became quite liberal, owing to a break in corn and to favorable news regarding the new crop in the Southwest. This tended to offset the effect of the congestion in May. The market closed irregular, May being firm and July and September barely steady. May opened a shade to \$55c higher, at \$55c to \$55c, advanced to \$55c higher, at \$55c to \$55c, advanced to \$55c and closed at \$55c. July sold between \$75c and \$85c and closed at \$75c.

Corn was weak almost all day because of heavy selling of the July and September deliveries by leading commission houses. Excellent weather for farm work and for the movement of grain to market was the weakening influence. Shorts were the principal buyers, the bull leaders making little protense of supporting the market. The close was weak, May opened unchanged to \$5 to \$1 lower, at \$65c to \$65c, sold at \$55c and then declined to \$65c. The close was at \$626c \$66c.

clined to 65¢c, sold at 67¢c and then declined to 65¢c. The close was at 662¢c 66\$c.

Oats were quite firm early in the session, owing to the bulge in wheat, but the late weakness of corn had a depressing effect, sithough the close was stendy. Trade was of light volume. May opened it higher, at 53¢c, advanced to 55¢c and then declined to 53¢c. The close was at 53¢c. July ranged between 45¢c and 45¢c and closed at 45¢c.

Provisions were rather weak at the start on selling by commiston houses, which was based on a 10c decline in live hogs. The market railled later in the day as a result of buying by shorts and closed steady. The principal trading was in the July and September options. July closed a shade lower, lard was unchanged, and ribs were 2½c lower.

DR. C. W.

THE MICROSCOPIC SPECIALIST

is the only Scientific Specialist in Sait Lake City using the microscope to form his diagnosis. He will tell each and every one of you just what your disease is, without any information from you, he will tell you all about your disease better than you can tell it you well. By the use of the MICROSCOPE we can detect Calcut, Cancerous Matter, Carbonate of Lime, Albumen and all extraneous substances mixed with the Urine or Blood. This, is the scientific principle of treating Chronic Diseases and Private Diseases. Just, call and see for yourselves.

MEN---DON'T GIVE

We Are Restoring Suffering Men Every Day to Robust Health. Many of Them, No Doubt, Were Much Weaker in Strength Than You.

You may have been unfortunate in selecting a doctor to treat you, or you may not have given yourself the attention which your disease demands. You know that every day you put the matter off you are getting worse and worse. Life does not possess for you the pleasures it did. Would you not give much to possess that robust health, vim and vigor that was yours before the cavages of disease attacked your system? Now, if you do really have this desire to be strong call at our institute at once and consult the RELIABLE SPECIALISTS, who have restored hundreds of men to health, many of whom, perhaps, were in worse condition than you are. In a short time after the treatment is begun, decided improvement is noticed, and when dismissed they go out from under our care restored to the health nature intended should be theirs.
